

CATCHING CARBON

IMPROVING SOIL. NAVIGATING MARKETS.

MAPLETON, ND

July 22, 2021 // 1:00 PM - 4:00 PM

Hagge's

650 Carl Olsen St., Mapleton, ND 58059

Or, join us virtually at

<https://www.hbsound.com/ndcorncarbon>

FEATURING

// Dr. Abbey Wick, NDSU

// Dr. Caley Gasch, NDSU

// Susan Samson-Liebig, USDA-NRCS

// Dr. Mark Liebig, USDA-ARS

// Dr. David Archer, USDA-ARS

Carbon credits are just one component of an emerging market for agriculture collectively known as “ecosystem services markets.” New opportunities may be on the horizon in terms of low carbon fuel standards, credits for biofuels production, direct carbon credit sales between farmers and buyers, water quantity and quality programs, and much more.

LEARN MORE about the science behind carbon, practices for carbon capture, and take a look at emerging opportunities for North Dakota corn producers during this FREE workshop. There will be time dedicated for discussion - bring your questions!

CATCHING CARBON

IMPROVING SOIL. NAVIGATING MARKETS.

JULY 22, 2021 | 1:00 PM CDT

MEETING AGENDA

WELCOME	Jean Henning Executive Director North Dakota Corn Utilization Council Dr. Abbey Wick Extension Soil Health Specialist North Dakota State University
CARBON SCIENCE <i>Laying the Groundwork</i>	Dr. Caley Gasch Assistant Professor of Soil Health - Research North Dakota State University
